

## SC 330P

### HIGH CAPACITY BODY COMPOSITION ANALYSER WITH INTEGRAL PRINTER

#### Benefits

The Tanita SC 330P, with its integral printer, provides accurate measurements and body composition analysis data, in just seconds.

The user-friendly, guided set-up process makes it the ideal Analyser for a busy health and fitness facility.

A handy analysis of the client's key measurements appears on the bottom of the print out providing an instant consultation tool.

Analysis data can also be transferred automatically to a computer. When used with GMon Health Monitor software, the SC 330 can be automatically set-up for personalised patient studies, capturing measurements and trend results in a variety of reporting formats.

#### Key features

- Simple-to-use
- 270kg high weight capacity
- Low profile, wide platform for additional stability
